(57) Abstract :

The present invention provides a devise for vibratory stimulation in upper limb that include gloves, vibrator. At present practioner are giving sensory input in upper limb manually by soft brush, sometime with manual vibration, on the other hand this practice may be given once in a day or twice, which is not sufficient to generate tone in such patients. Present invention will provide continuous vibratory stimulus at regular interval in upper limb which may be helpful in developing appreciable tone. Figure 1
