(57) Abstract :
The present invention provides a vibrator strap for chest physiotherapy for removal of secretions from various lobes. The present practice uses a chest vibrator which is relatively big and almost same for every patient and due to this there may be a chance of cross infection in ICU and Wards. This practice is only limited to few minutes and most of the time once a day but there are cases where patient require three or four visit for chest physiotherapy. The present invention may overcome these issues. Figure 1
