(57) Abstract :
 The present invention provides a crystalline salt composition for enhanced jal-neti experience that simplifies this process with the water-soluble crystalline salt composition that homogeneously dissolves in water and forms the perfect solution for Jal-Neti. This composition is carefully formulated to match the optimum pH suitable for human physiology so it would be helpful to avoid irritation or any other discomfort caused by osmotic imbalance; it also includes a clinically permitted anti-microbial agent that would be used to disinfect the Jal-Neti solution. The Neti-Kshar crystals would be designed and packed in pre-measured sachets, ensuring convenience and accuracy in preparing 250 mL water solution to perform Jal-Neti. This modernised approach to Jal-Neti makes nasal cleansing more convenient, safe, therapeutic, and ideal for those seeking to maintain nasal health, reduce congestion, or practice yoga traditions with ease.
