(57) Abstract :

The present invention provides Eco-friendly cleaner for chalkboards and whiteboards. The invention is a liquid cleaning solution specially formulated for cleaning both traditional chalkboards and modern whiteboards. The solution is composed of 10% acetic acid and 20% acetone in an aqueous base. It effectively removes chalk residue, marker stains, grease, and dirt while being safer than many commercial cleaners. The formulation is non-toxic in its intended use, dries quickly, and does not leave residue or damage board surfaces. It is a cost-effective and eco-conscious alternative to alcohol-based and ammonia-containing board cleaners.
