

Clinical Death Review

Date : 28.12.2024

Time: 03:30 PM – 04:30 PM

Day : Saturday

Venue: HLT-2, Charak (Lecture Hall)

Topic: Mortality Review and End of Life Care Advanced Cancer Esophagus

Moderator: Dr Madiwalesh Chebbi

Abstract:

- Carcinoma of the esophagus is the seventh most common malignancy and the sixth most common cause of cancer related death. Majority of the patients have unresectable and or metastatic disease at presentation. The symptoms are numerous and complex including pain, dysphagia, malnutrition, other symptoms due to stage, location, and extent of the tumor. The required treatments also exact a hefty toll on the patient physical and mental health. These patients benefit from a comprehensive approach to care to effectively support their physical, emotional, and spiritual needs.
- The optimal treatment for patients with advanced malignancies of esophagus needs to be tailored according to several factors including the disease status, patient factors. The treating team has to consider the social, economic and psychological aspects of the family in addition to the optimal utilisation of resources. The same requires comprehensive cancer care under multidisciplinary oncology care team. An appropriate management can let the patient live well and fully for as long as possible in the face of illness.
- Our presentation outlines the key components of high-quality comprehensive care, including palliative advanced care planning, symptom management and psychosocial support with the help of a case capsule.

Program for Mortality Presentation

Moderator	Dr Madiwalesh Chhebbi, Assistant Professor, Department of Surgical Oncology
Case Capsule	Dr Vinay G, Senior Resident Department of Surgical Oncology
Introduction to carcinoma esophagus.	Dr Madiwalesh Chhebbi, Assistant Professor, Department of Surgical Oncology
Palliative care approach and End of Life Care	Dr Priya Ramakrishnan, Professor Department of Anesthesia
Cancer Esophagus: Our experience	Dr Rajeev, Senior Resident Department of Surgical Oncology
Concluding remarks	Dr Sunil Saini, Professor and Head Department of Surgical Oncology
Discussion and Q & A	

All Faculty & Post Graduate Residents are required to attend the CDR.
