**Speakers:** Dr. Sunil Saini, Professor & Head  
Dr. Manisa Pattanayak, Associate Professor, Dept. Surgical Oncology  
Dr. Madiwalesh Chhebbi, Assistant Professor, Dept. Surgical Oncology  
Dr. Gurpreet Singh, Assistant Professor, Dept. Surgical Oncology

**Abstract:**

Breast cancer is one of the **most frequently diagnosed malignancies** on the planet. With the incidence of the disease **continuously** rising; the expected burden of patients is now **one in 22** urban women. The disease is no longer solely a problem of the West. Even in India, it constitutes 27% of all cancer burden in women. Breast cancer now ranks among the top two diagnosed malignancies among women in 25 of 28 states in India and more than 150 countries worldwide

Patients with breast cancer face challenges throughout the entire journey: diagnosis, treatment, post-treatment, and recovery. The breast cancer patient and the family are exposed to a multidisciplinary team, multiple visits, several investigations, and practically numerous treatment options.

With the example of a case scenario, we intend to bring forth the questions and challenges faced by both the patient and the caregiver in addressing these issues during their initial visits to the hospital. We at CCRC have a multidisciplinary team offering state-of-the-art care for patients with all forms and stages of the disease. Through this CME, we intend to address the questions that patients ask, educate the audience, and guide them in understanding the multifaceted approach required for breast cancer treatment.

**Keywords:** Breast Cancer, Multidisciplinary Management, Holistic Approach.

All Faculty & Post Graduate Residents are required to attend the CME.
