**REPORT OF WORKSHOP ON INTEGRATED MANAGEMENT OF NEONATAL AND
CHILDHOOD ILLNESS (IMNCI)**

The Child Health Nursing Department of Himalayan College of Nursing organized a workshop on “Integrated Management of Neonatal and Childhood Illness” on April 5, 2025 at Mother Teresa Auditorium. The objective of the workshop was to enhance the skills of participants in management of neonatal and childhood illness. The event commenced at 8:30 AM with the registration of participants, followed by a pre-test conducted via Google Forms. Dr. Dipti Y. Sorte welcomed the faculty and participants, providing a brief introduction to IMNCI.

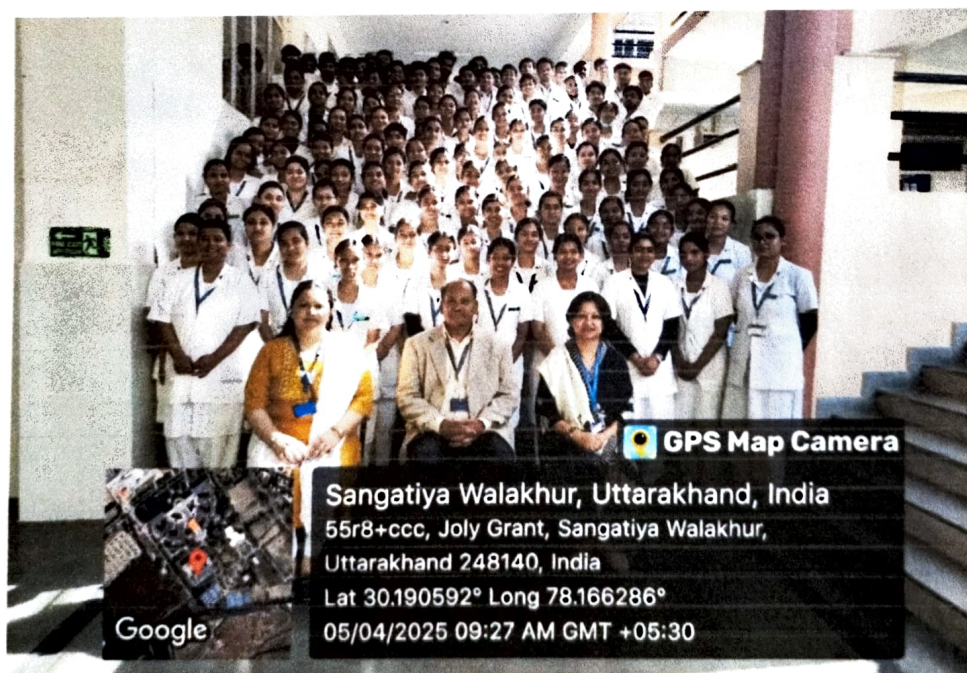

The training was conducted through four interactive workstations:

Workstation 1 – Assessment of sick infant and child & Classify child for possible serious bacterial infection

Workstation 2 – Identification and Management of Malaria (Infant & Young Children)

Workstation 3 – Identification and Management of Anemia (Infant & Young Children)

Workstation 4 – Identification and Management of Malnutrition (Infant & Young Children)

Picture 1: Group photograph of faculty and students

A total of 144 students from the B.Sc. Nursing 5th Semester were divided into four groups, rotating through each station for 40 minutes. Each station had a dedicated facilitator who demonstrated the procedures with explanations, followed by hands-on practice where students re-demonstrated the skills.

After completing all workstations, participants engaged in scenario-based skill assessments, where they performed IMNCI tasks in simulated scenarios. Additionally, students showcased role plays on diagnosis and management of malaria, malnutrition, and anemia, demonstrating great enthusiasm and precision.

The workshop concluded with a post-test, feedback session, and vote of thanks. The event's success was made possible through the efforts of Dr. Rajkumari Sylvia Devi, Dr. D. Y. Sorte, Dr. Vandana Chauhan, and Mrs. Namrata Pundir, faculty members from the Child Health Nursing Department. This workshop proved to be a valuable learning experience, equipping students with IMNCI skills through hands-on training and interactive learning.
