Topic: "Wandering Device – A cardiac emergency"

Abstract:

We are presenting two cases which were operated at our hospital in January 2025 on emergency basis. One was a cardiac emergency & the other one was a case of RTA with Right knee dislocation & vascular injury.

First case was an attempted ASD device closure at Haldwani but the device got dislodged. Patient was sent to us in emergency for device retrieval & ASD closure.

Second case was a young lady who met with RTA at 09:30 AM & reached our emergency with Right leg injury (Open wound) & no movement of Rt leg. Limb was salvaged with combined efforts of Orthopedics, CTVS & Plastic surgery teams.

Both cases have important messages for us & our junior colleagues in emergency & surgical department.
