

## **Report on BMW**

The session on Biomedical Waste (BMW) management was conducted on 24.01.2024 at Himalayan Hospital, Jolly Grant, Dehradun from 12:30 PM to 01:30 PM. It began with an introduction emphasizing the significance of BMW management, followed by a warm welcome to the guests. A pre-test assessed attendees' initial knowledge before an overview of the topic was provided. The session delved into the classification, sources, and regulatory guidelines of BMW, highlighting various treatment and disposal methods such as incineration, autoclaving, chemical disinfection, deep burial, and shredding. Workers' health and safety measures, including PPE use, hand hygiene, safe handling practices, and vaccination, were discussed. The chief guest provided feedback and suggestions to improve awareness and waste management policies. A post-test evaluated knowledge retention, followed by a vote of thanks appreciating all contributors. The event concluded with refreshments, fostering informal discussions and networking opportunities.
