CME

Date : 11.01.2025

Time: 03:30 PM – 04:30 PM

Day : Saturday

Venue: HLT-2, Charak (Lecture Hall)

Topic: “Hysteroscopy- Third eye of Gynaecologist.”

**Speaker: Dr. Anchal Agarwal (Assistant Professor)
Obstetrics & Gynecology, HIMS**

Abstract:

Hysteroscopy involves inserting a rigid or flexible hysteroscope through the cervical canal into the uterus and then using distending media to allow for complete visualization of the endometrial cavity. It allows for minimally invasive diagnosis and surgical management of endocervical and intrauterine pathology. It is considered the gold standard technique for evaluating and managing intrauterine pathology. Indications for hysteroscopy are numerous, including heavy menstrual bleeding, infertility, removal of intrauterine foreign bodies, and congenital Mullerian anomalies. It is a gynaecologist's signature surgical procedure and when used judiciously can serve as a powerful weapon in combating the menace of abnormal uterine bleeding.

Presenters plan to cover the role of Hysteroscopy in the diagnosis and management of intrauterine pathologies and share some interesting cases managed in the Department via Hysteroscopy.

All Faculty & Post Graduate Residents are required to attend the CME.
