Topic: Candida Sepsis in Infants: Recognising the Invisible Threat

Presenter: Dr. Prashant Gautam, Junior Resident, Paediatrics

Moderator: Dr. Anil Rawat, Professor & Head, Paediatrics

Abstract:

Fungal sepsis, especially invasive candidiasis, is an increasingly recognised cause of critical illness and mortality in vulnerable infants. Awareness of its risk factors- prior antibiotic exposure, nutritional deficiencies, incomplete immunisation, and immunodeficiency- empowers clinicians to identify at risk children early and act before organ dysfunction becomes irreversible.

Candida must be considered a genuine pathogen in any critically ill child who fails to respond to standard antimicrobial therapy. With heightened clinical vigilance and proactive institutional protocols, deaths from fungal sepsis are preventable.
