Workshop Report  
Oncology Updates & Indo-Canadian SBRT Workshop  
From Rockies to Himalayas

**Dates:** 7th–8th February 2026

**Venue:** Adi Kailash Auditorium & Computer Lab, School of Science and Technology, Swami Rama Himalayan University (SRHU), Dehradun

**Organised by:** Department of Radiation Oncology, Cancer Care & Research Centre (CCRC), Himalayan Institute of Medical Sciences (HIMS)

**In collaboration with:** Uttarayan Cancer Foundation and Swami Rama Himalayan University

## Introduction

The Oncology Updates & Indo-Canadian SBRT Workshop: *From Rockies to Himalayas* was successfully conducted on 7th and 8th February 2026 at Swami Rama Himalayan University, Dehradun. This two-day academic event was organised by the Department of Radiation Oncology, Cancer Care & Research Centre (CCRC), Himalayan Institute of Medical Sciences (HIMS), in collaboration with the Uttarayan Cancer Foundation. The workshop aimed to provide comprehensive updates in contemporary oncology with a special focus on Stereotactic Body Radiotherapy (SBRT), integrating international and national perspectives.

The workshop witnessed enthusiastic participation from approximately 150–200 delegates, including radiation oncologists, medical oncologists, surgical oncologists, medical physicists, residents, and students. All registered members and faculty were present and actively participated in the scientific deliberations, hands-on sessions, and panel discussions.

The event also recorded remarkable student participation from medical colleges and oncology training institutes across the country. Postgraduate students travelled from various states of India to attend the workshop, reflecting the national academic importance of the program. Their active involvement in

discussions, hands-on contouring sessions, and panel interactions added vibrancy and academic depth to the event.

An academic poster presentation session was organised as part of the workshop to encourage research culture and scholarly exchange among young oncologists. Students and residents presented scientific posters showcasing original research work, clinical studies, and case-based discussions in oncology. The poster session provided a valuable platform for academic interaction, peer learning, and constructive feedback from senior faculty members and experts.

## **Day 1: 7th February 2026**

The first day commenced with the inaugural session and welcome address by Dr. Sunil Saini, setting the tone for an academically enriching program. The morning session was dedicated to a pre-conference hands-on SBRT contouring workshop focusing on lung and brain malignancies. These sessions were conducted in an interactive format, allowing participants to gain practical insights into target delineation, planning principles, and clinical decision-making in SBRT.

The post-lunch session at the Adi Kailash Auditorium featured scientific lectures on thoracic and genitourinary oncology. Eminent international faculty delivered insightful talks on SBRT for lung and prostate malignancies, highlighting evidence-based outcomes, safety profiles, and advanced techniques. National faculty members complemented these sessions by discussing evolving treatment landscapes, multidisciplinary approaches, and real-world clinical experiences.

Panel discussions formed a major highlight of the day, particularly on evidence-based management of lung cancers and genitourinary malignancies. These sessions encouraged active audience interaction and fostered meaningful exchange of ideas among faculty and delegates. The day concluded with breast oncology sessions, covering contemporary topics such as axillary management, HER2-targeted therapies, and multidisciplinary panel discussions.

## **Day 2: 8th February 2026**

The second day focused on site-specific oncology and advanced radiotherapy techniques. Sessions on hepato-biliary cancers provided updates on liver SBRT, immunotherapy in biliary tract cancers, and multidisciplinary management strategies. Expert speakers, including Dr. Vibhay Pareek (Canada), shared global perspectives supported by recent literature and clinical data.

Neuro-oncology and medical physics sessions formed the core of the latter half of Day 2. Topics such as brain SRT, fractionation strategies, SBRT planning nuances, and comparisons between SRT and surgical approaches were discussed in detail. International experts enriched the sessions with their extensive experience and technical expertise.

The workshop concluded with a panel discussion on brain metastases, followed by closing remarks and certificate distribution. The formal valedictory session acknowledged the contributions of all faculty members, organisers, and participants. A gala dinner was hosted on the evening of 7th February 2026, providing an opportunity for informal interaction and academic networking.

## **Faculty and Participation**

The workshop was graced by a distinguished panel of international and national faculty from reputed institutions across India and abroad. The presence of experts from Canada added significant academic value and strengthened international collaboration. All invited faculty members, chairpersons, and panellists actively participated in the sessions, contributing to high-quality scientific discussions.

The event witnessed strong national representation, with delegates from multiple states across India. The inclusive academic environment encouraged knowledge sharing between senior consultants, young faculty members, and trainees. The poster presentation segment further strengthened the academic rigor of the conference by promoting research dissemination and scholarly dialogue.

The Oncology Updates & Indo-Canadian SBRT Workshop 2026 was a resounding success, achieving its objectives of knowledge dissemination, skill development, research promotion, and fostering collaboration in the field of oncology. The comprehensive scientific program, hands-on workshops, poster presentations, and multidisciplinary discussions provided valuable learning experiences for all participants.

The organising committee extends sincere gratitude to all faculty members, delegates, sponsors, and supporting staff for their invaluable contributions. The workshop has laid a strong foundation for future academic collaborations and reaffirmed the commitment of the Department of Radiation Oncology, CCRC, HIMS, towards excellence in oncology education and patient care.
