**REPORT ON ARTIFICIAL REPRODUCTIVE TECHNOLOGY FOR INFERTILITY
TREATMENT**

Name of Activity: CNE on Strategies for Slow and Advanced Learners (Review) and Artificial Reproductive Technology for Infertility Treatment

Date: February 24, 2026

Time: 12:30 to 1:30 PM

Venue: Conference Room, HCN

No. of Participants: 35

The Continuing Nursing Education Committee organized a review session on “Strategies for Slow and Advanced Learners,” conducted by Dr. Sanjenbam Emon Chanu, with the aim of equipping faculty members to effectively address diverse learning needs. The session emphasized identification of learners, implementation of remedial measures and close academic guidance for slow learners, and enrichment activities along with advanced assignments for high achievers. Special focus was given to systematic documentation of interventions and outcomes to ensure continuous academic monitoring and improvement.

This was followed by the main CNE session on “Artificial Reproductive Technology (ART) for Infertility Treatment” exclusively for faculty members with the objective of updating and strengthening their knowledge regarding recent advances in infertility management. The session provided a comprehensive overview of the causes and types of infertility in both males and females, diagnostic approaches, and indications for ART procedures. Detailed discussions were held on various techniques such as in vitro fertilization (IVF), intrauterine insemination (IUI), and intracytoplasmic sperm injection (ICSI), including their procedures, success rates, indications, and possible complications.

Special emphasis was placed on ethical and legal considerations, informed consent, emotional and psychological support for couples, and the importance of maintaining confidentiality and professional standards. She also highlighted the evolving role of nursing educators in imparting evidence-based knowledge to students and preparing them to provide holistic care to couples undergoing infertility treatment. The programme proved to be informative and enriching, enhancing the faculty members’ understanding of current technological advancements and strengthening their teaching effectiveness as well as clinical guidance.
