Criterion 1 - Curricular Aspects

1.1.1 Outcome Analysis of POs, COs

M.Sc. Biotechnology (2021-2023)

Himalayan School of Bioscience

Swami Rama Nagar, Jolly Grant, Dehradun 248016, Uttarakhand, India

A. Program Outcomes

After successful completion of the program, graduating students/graduates will able to:

| | | |
|------------|--------------------------|---|
| PO1 | Knowledge | To Learn theoretical and practical knowledge of fundamental and applied aspects of life sciences. |
| PO2 | Analysis | To understand the finer intricacies of diversified fields of subject involved in the interdisciplinary aspect of Biotechnology. |
| PO3 | Use of Technology | To develop subject based analytical skills, practical knowledge and competency for applied research and development. |
| PO4 | Ethics | To learn effective scientific communication, research design and interpret experiments to undertake challenging and new opportunities in academia and industry. |
| PO5 | Learning | To apply multidisciplinary skills and knowledge for higher studies or applied research in a global, economic, environmental, and societal context. |

B. Course-wise CO-PO Mapping

Mapping factor or Correlational level between Course Outcome (CO) and Program Outcomes (PO) indicates to what extent the teaching and assessment method of CO correlates/contributes the PO at the level defined below:

| Correlation Level | Particulars |
|-------------------|--|
| 3 | Substantial/high contribution of CO towards PO |
| 2 | Moderate contribution of CO towards PO |
| 1 | Slight/low contribution of CO towards PO |

| Course Code | Course Title | CO-PO Mapping (Articulation Matrix) | | | | |

| MMBC 101 | General Microbiology | | | | | |
| CO# | At the end of the course the students will be able to: | PO1 | PO2 | PO3 | PO4 | PO5 |
| CO1 | Describe and comprehend the fundamental concepts of various microbes, methods of media preparation and cultivation | 2 | 3 | 3 | 3 | 2 |
| CO2 | To understand the classification and diversity of microbes | 2 | 3 | 1 | 2 | 2 |
| CO3 | To demonstrate the knowledge and critical understanding on the diverse microbial structure and morphology | 2 | 2 | 2 | 2 | 2 |
| CO4 | Versed in theoretical and practical aspects of fungal, algal and protozoan microbiology | | 2 | 3 | 3 | 2 |
| CO5 | Plan basic experiments on microbial cultivation, microbial genetics and numeration | | 2 | 2 | 2 | 3 |

D. Assessment of CO and PO Attainment Value

The attainment of the course outcome is measured at the level of 3 as follows:

| Attainment Levels | Criteria |
|-------------------|---|
| 3 | If 80% of student achieves marks greater than threshold percentage of the total score of assessment |
| 2 | If 70% of student achieves marks greater than threshold percentage of the total score of assessment |
| 1 | If 60% of student achieves marks greater than threshold percentage of the total score of assessment |
| 0 | If 60% of student achieves marks less than threshold percentage of the total score of assessment |

Attainment level of COs is measured through direct attainment of COs depending on the performance of the students in Internal Assessment (IA) and End Semester Examination (ESE) individually. For the program the threshold percentage is set at 50% for ESE and 60% for IA. assessments. The weightage of attainments for IA and ESE is in proportion of 40 : 60.

From the Attainment level of CO, the Derived PO's value for course is calculated as follows:

$$\text{Derived PO Value} = \frac{\text{CO attainment} \times \text{respective PO average}}{3}$$

Depending on derived PO values of the courses, calculate the Course-wise Average of POs achievement for each PO.

Calculate the percentage attainment of PO's as follows:

$$\text{Percentage attainment of PO's} = \frac{\text{Average PO Attainment through}}{\text{average PO reference value}} \times 100$$
