## A. Program Outcomes

After successful completion of the program, graduating students/graduates will able to:

<b>PO1</b>	<b>Knowledge</b>	Interdisciplinary understanding of the basic and applied aspect of Biochemistry
<b>PO2</b>	<b>Analysis</b>	Capability to acquire and analyse the different societal/industrial/economical/fundamental & applied research problems, design, execute, find solution and demonstrate.
<b>PO3</b>	<b>Use of Technology</b>	Advanced biochemical and molecular techniques to conduct experiments to test scientific hypotheses, analyse data, and understand trouble-shooting & limitations.
<b>PO4</b>	<b>Ethics</b>	Professional ethics and responsibilities as a social endeavour to bring harmony with nature.
<b>PO5</b>	<b>Learning</b>	Skills for industrial applications in various applied area of biological sciences and entrepreneurship

## B. Course-wise CO-PO Mapping

Mapping factor or Correlational level between Course Outcome (CO) and Program Outcomes (PO) indicates to what extent the teaching and assessment method of CO correlates/contributes the PO at the level defined below:

Correlation Level	Particulars
3	Substantial/high contribution of CO towards PO
2	Moderate contribution of CO towards PO
1	Slight/low contribution of CO towards PO

Course Code	Course Title	CO-PO Mapping (Articulation Matrix)				
MMBC 101	General Microbiology					
CO#	At the end of the course the students will be able to:	PO1	PO2	PO3	PO4	PO5
CO1	Describe and comprehend the fundamental concepts of various microbes, methods of media preparation and cultivation	2	3	3	3	2
CO2	To understand the classification and diversity of microbes	2	3	1	2	2
CO3	To demonstrate the knowledge and critical understanding on the diverse microbial structure and morphology	2	2	2	2	2
CO4	Well versed in theoretical and practical aspects of fungal, algal and protozoan microbiology		2	3	3	2
CO5	Plan basic experiments on microbial cultivation, microbial genetics and numeration		2	2	2	3

## D. Assessment of CO and PO Attainment Value

The attainment of the course outcome is measured at the level of 3 as follows:

Attainment Levels	Criteria
3	If <b>80%</b> of student achieves marks <b>greater</b> than threshold percentage of the total score of assessment
2	If <b>70%</b> of student achieves marks <b>greater</b> than threshold percentage of the total score of assessment
1	If <b>60%</b> of student achieves marks <b>greater</b> than threshold percentage of the total score of assessment
0	If <b>60%</b> of student achieves marks <b>less</b> than threshold percentage of the total score of assessment

Attainment level of COs is measured through direct attainment of COs depending on the performance of the students in Internal Assessment (IA) and End Semester Examination (ESE) individually. For the program the threshold percentage is set at 50% for ESE and 60% for IA. assessments. The weightage of attainments for IA and ESE is in proportion of 40: 60.

From the Attainment level of CO, the Derived PO's value for course is calculated as follows:

$$\text{Derived PO Value} = \frac{\text{CO attainment} \times \text{respective PO average}}{3}$$

Depending on derived PO values of the courses, calculate the Course-wise Average of POs achievement for each PO.

Calculate the percentage attainment of PO's as follows:

$$\text{Percentage attainment of PO's} = \frac{\text{Average PO Attainment through}}{\text{average PO reference value}} \times 100$$
